

# 1 Insert CAMplete USB Installer

Do not insert the Sentinel USB key until instructed. Instead, insert the blue CAMplete Solutions Inc USB installer into one of your computer's USB ports. Using Windows Explorer, navigate to the USB drive and locate "Setup\_x64.exe".

# 2 Open Installation Wizard To Select & Install Components

Double click the "Setup\_x64.exe" file to open the installation wizard. A window will appear with preselected components to install. Unselect any components you do not wish to include and click **Install**. *The Sentinel drivers must be installed in order to run the software, so ensure that they are already installed on your system if you choose to unselect the Sentinel component.*

# 3 Follow Prompts

If you choose to install the Sentinel drivers, the installer will automatically launch. Follow the prompts to complete this installation.

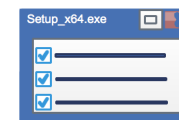

# 4 Insert Sentinel USB

Insert the Sentinel USB license key into one of your computer's USB ports. This is the security key and will be purple or red.

# 5 Install Microsoft VC++ 2008 Redistributable Installer

If you choose to install the "Microsoft VC++ 2008 Redistributable Installer", the installer will start automatically. If you are presented with "Repair/Uninstall" dialog, this means it was previously installed and you may click **Cancel**. Otherwise, follow the prompts to complete the installation.

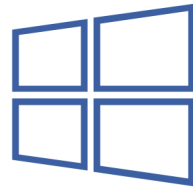

# 9 Step CAMplete Software Installation

# 9 Close Window

Click **Close** to complete the setup. The application can be started by clicking on the shortcut in the "Windows Start Menu"

# 8 Agree To License Agreement & Install Machine(s)

## Agree To License Agreement & Install Machine(s)

When the machine installer launches, review the license agreement. Once you have agreed to the terms of the license, you will see the install screen listing the machine(s) to be installed. Click **Install** to install the machine files, then click **Close** to return to the main installer.

# 7 Select Components & Install

## Select Components & Install

Select the components you would like to install and click **Next**. Choose the install location for the application, then click **Next**. Choose a "Start Menu Folder" for the application then click **Install**. Once the application installer is complete, click **Close** to return to the main installer.

# 6 Install Microsoft VC++ 2008 Redistributable Installer

When the CAMplete TruePath installer launches, a pop up will appear asking "Would you like the application data to be shared by all users of this computer?", click **Yes**. *If you skipped the Sentinel driver installer and have not yet plugged in your Sentinel USB security key, plug it into one of your computer's ports.*
